Specialised Safety Inspections.

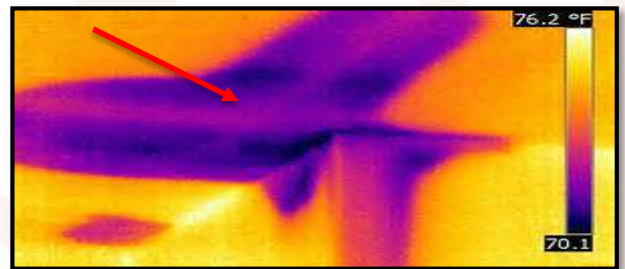

- ✓ Thermographic leak Detection
- ✓ Thermographic Electrical Safety Inspections
- ✓ Defects Inspection Reports
- ✓ Property Condition Reports
- ✓ Coating Inspections

Thermographic Moisture/Leak detection

Diagnostics of this damage was required by the owner for an insurance claim, as conventional images could not adequately show the extent of damage. Thermal imaging was the only non-destructive method to evaluate the water damage.

The leak was caused by a contractor installing solar panels on a roof and neglecting to weatherproof the fixings in the roof coverings. Early diagnostics of the issue saved time and further damage to the building.
